

# WATER SHORTAGE

Every Drop Counts! 

# | What is Water?

- 💧 Water is essential for all known forms of life.
- 💧 It covers 71% of the Earth's surface, mostly in oceans.
- 💧 Without water, life as we know it would not exist!
- 💧 It is a precious resource that we must protect.

# Why is Water Important?

## For Life

All living things, from tiny bugs to giant whales, need water to survive.

## For Drinking

Humans need to drink fresh water every day to stay healthy and hydrated.

## For Farming

Farmers need huge amounts of water to grow the food we eat every day.

# Causes of Water Shortage

## Drought

When it doesn't rain for a long time, rivers dry up and the ground cracks.

## Pollution

Trash and chemicals make water unsafe to drink or use for farming.

## Overuse

Leaving taps running and wasting water drains our precious supplies.

# What Happens Without Water?

- 💧 **Plants Die:** Crops cannot grow, leading to less food for everyone.
- 💧 **Animals Suffer:** Wildlife and pets lose their homes and drinking sources.
- 💧 **People Get Sick:** Without clean water, diseases can spread quickly.
- 💧 **Ecosystems Collapse:** Nature loses its balance, affecting the whole planet.

# | How Can We Save Water?

## **Turn Off Taps**

Don't let the water run while brushing your teeth or washing your hands.

## **Use Carefully**

Take shorter showers and fix leaky faucets in your house immediately.

## **Water Wisely**

Water plants in the early morning or evening to stop the sun drying it up.

# Conclusion: Water is Life!

## Let's Save It!

Remember, every small action counts. You can be a water hero today!

---

### Activity for Kids

Draw a picture of one glass of water and write down one way you promise to save water this week.
