

Name:	Studysheet2 2025-2026 Subject: Science	School: الاولية المختلطة
Class: 5 th grade (A, B, C, D)		
First Semester		Date: / / 2025

Dear parents and students,

The Second quiz for science will be on Wednesday 12/Nov/2025

The required lessons are:

- 1- Flowering plants p33
- 2- How are traits passed along? P50 and 51

Lesson 2: How are traits passed along?

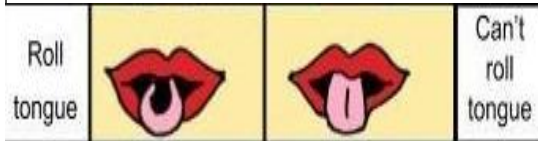

Inherited traits:

Traits that pass from parents to their offspring

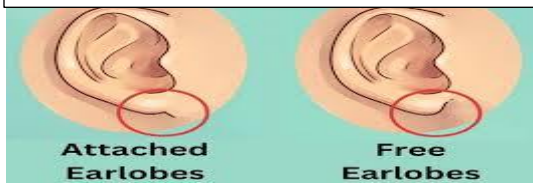

Some inherited traits in humans include:

The ability to curl your tongue is a trait that offspring can inherit from their parents

free or attached earlobe

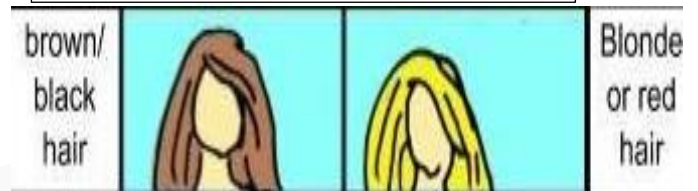

window peak or straight hair

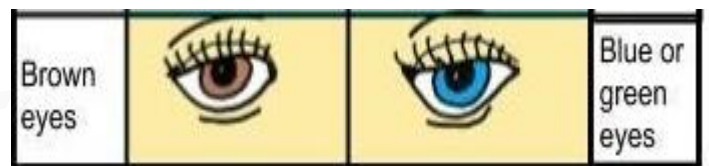

straight or curly hair

hair color: dark or light hair

eye color (green or brown)

Lesson 2: How are traits passed along?

People who are closely related usually have some traits in common

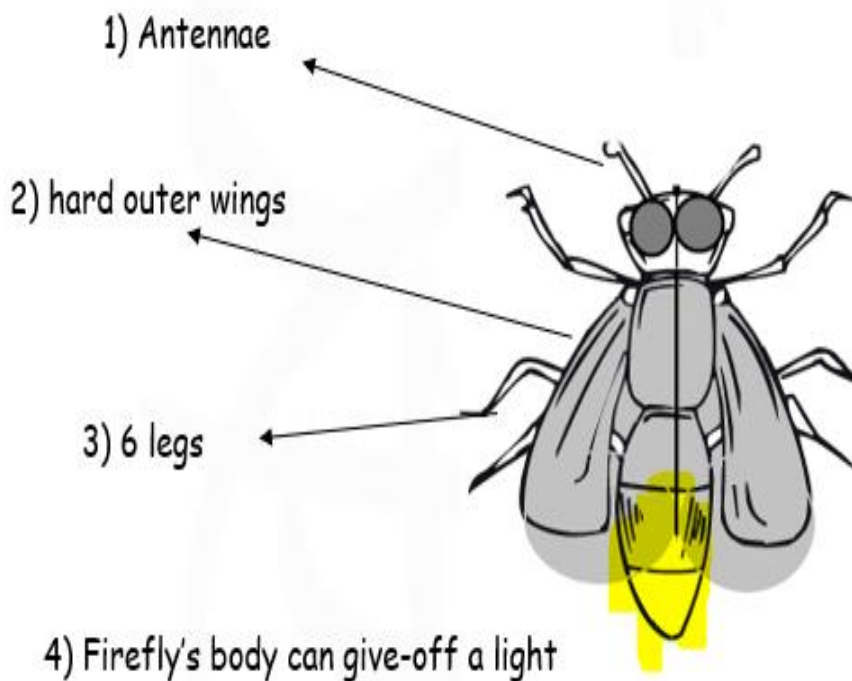

Having two parents, however means that members of a family are not exactly alike

Some diseases passed from parents to their offsprings

Every kind of organism (animals, plants and human) has its own traits

What are the firefly traits?

Explain how a firefly can give off light:

Firefly body produces a chemical that can change energy in its cells into light
